

**IMPORTANT!! PLEASE READ ENTIRE INSTRUCTION SHEET BEFORE ASSEMBLY!!**

**Step 1:** Identify all parts packed in the carton against the parts list. Remove all protective materials. If you are missing any parts or are unsure how to proceed with assembly, please call our Customer Service Center immediately at 1-800-416-3511. **Do not attempt to assemble the table if any parts are missing or damaged.**

**Step 2:** With the help of another person, place tabletop upside down on a flat, non-abrasive surface to avoid scratching the glass and rim. Note the plastic fittings on the inside of the table rim. These fittings slide. Adjust, if necessary, by sliding the fittings into proper position in the corners as shown in diagram below. If applicable, adjust the flat plastic supports so they are evenly spaced between plastic fittings. Insert legs into the plastic fittings of the rim.

**Step 3:** Attach leg connector bracket (begin with the leg connector bracket closest to the table) by inserting bolt through the table leg and leg connector bracket. Secure bolt with nut. **Hand tighten only** (do not fully tighten bolts at this time as some adjustments may be necessary between the leg connector bracket and the legs to ensure proper alignment of the table legs). Repeat for remaining table legs. Repeat procedure for remaining leg connector bracket.

**Step 4:** Tighten all nuts and bolts using the Hex Bolt Driver and Hex Wrench provided. Important note: each bolt should be tightened a few revolutions at a time, alternating between bolts in a cross corner ("X") fashion. This will ensure your table is level by placing equal pressure on all bolt joints. Do not over tighten. Cover all nuts and bolts with PVC covers provided.

**Step 5:** With the help of another person, carefully turn the table in the upright position. Your table is now ready for use. If you have any questions, please call our Customer Service Center at 1-800-416-3511.
